

Garlando Combi outdoor trampoline with safety net

Product features:

Product description:

This **Combi trampoline** for outdoor use with safety net included, has a steel tube **frame** , galvanized externally and rustproof internally.

The **structure** is made up of "T" elements, without welding, non-deformable and indestructible, for maximum durability and safety.

The **carpet** is made of Permatron polypropylene, waterproof and resistant to ultraviolet. The sheet is fixed to the springs by a series of "V" hooks covered in fabric with numerous rows of points

Equipped with **protective cushions** in external polyester covering, internal high-density foam rubber.

It has biconical springs for increased resistance, in galvanized steel externally and internally, anti-rust.

Frame : galvanized steel uprights with a diameter of 25 mm, covered with thick shockproof foam rubber padding.

The net is made of UV-resistant polyester with small mesh, anti-imprisonment and increased tear resistance.
