

Ballasted basketball system transportable on wheels San Diego Garlando

Product features:

Packaging dimensions:

Product weight:

Weight of the packaged product:

Basket height: 225 - 305 cm

Product description:

The San Diego Garlando basketball facility with MDF backboard is perfect for the most expert players thanks to the regulatory equipment and the semi-professional backboard.

The base of the plant is made of black molded polyethylene, easily transportable thanks to the wheels on the front and fillable with water or sand to ensure maximum stability during play. Two drainage holes allow you to fill and empty the base with ease.

The upper part of the system, the one used for adjusting the playing height, is made of **galvanized steel**, to avoid the formation of rust and allow the system to be used outdoors without problems.

The **scoreboard**, measuring 110x70x3.5 cm, regulation in transparent acrylic is mounted on a painted steel box structure with rear reinforcement ribs and stabilizing metal bars, 35 mm thick. Complete with powder-coated steel basket with fixed hoop diameter 45 cm and polypropylene net for outdoor use.

The **ballast** can be filled with water or sand for a maximum weight of 110 and 140 kg respectively.

The height of the basket is adjustable to multiple positions, up to the maximum regulatory size of **3.05 m**.

The system is supplied with **accident prevention protection** to cushion accidental blows against the column.
