Product description:

The **Stratos Air Hockey table** is professionally sized and made with excellent quality material, capable of guaranteeing maximum resistance and durability over time.

The **cabinet** and **legs** are in mm thick MDF. 16, with black coating and chromed profiles, treated as shockproof and scratchproof. The legs are equipped with feet to level the playing surface on any floor.

The **handrail** is made of MDF covered in aluminum-coloured laminated PVC with black-coloured laminated PVC corners.

The **MDF playing surface** with a thickness of 16 mm, with a professional white PVC surface with geometric designs, it is easy to clean and resistant to scratches. The playing surface is equipped with 220V/240V/50/60 Hz electrical connection with a pressure, covered with a high-quality black PVC surface. An ON/OFF switch allows you to turn the machine on and off.

Double roll bar in tubular iron with plastic display containing an electronic scoreboard for indicating goals. The scorekeeper is already programmed with "sound" mode (it emits a sound every time a goal is scored).

The recovery of pucks in the goal takes place via two exits at the goals.
Included are 4 knobs and 4 disks.
