

High jump landing area Monocube type complete with nail-proof mat World Athletics approved

**Product features:**

Mattress Construction: Alveolar

Coating: PVC 650gr/m<sup>2</sup> Fireproof- Class 2 fire rating

**Product description:**

**High jump fall area** , dimensions **600x400x70(h) cm** with "**Monocube**" type construction, **World Athletics approved**.

The fall area, in this version with dimensions 600x400x70(h) cm, has **World Athletics approval** , this is made with **blocks of expanded polyurethane foam (PU)** , with a density of 21kg/m<sup>3</sup> and a **thickness of 60 cm** . and covered with a **single tear-proof PVC lining** , weighing 650gr/m<sup>2</sup>.

The internal construction is of the "**alveolar**" type, in order to better cushion the athlete's fall, while the PVC covering is equipped with **air leaks** , which avoid the "balloon" effect during the impact phase with the mattress.

Above, the **mat with anti-nail net** is positioned, **10 cm thick** , bringing the fall area to a **height of 70 cm** . also made in a single solution.

As with the standard 600x400x70(h) cm models, this version of the fall area is also created without recesses for the uprights.

**To complete** the fall area it is possible to purchase the custom-made **rain cover** , essential for protecting the mattress from atmospheric agents, and the painted or galvanized **steel lifting structure** .

The approval certificate and the technical diagram are available in the "attachments" section
