

Rainproof cover for high jump landing area

Product features:

Material: PVC

Product description:

Rainproof cover for high jump landing area.

Made of **PVC weighing 650gr/m²** , this sheet performs the essential function of **protecting and preserving the fall area** from excessive wear, due to **continuous exposure to atmospheric agents** .

The waterproofing is given not only by the material, but also by the construction technology which involves **the electrowelding of the parts that compose it.**

The sheet is **equipped with perimeter steel eyelets** , useful for anchoring it to the support structure, and is **produced to measure** , to adapt perfectly to the fall area.
