

Anti-trauma marker bar for High Jump and Pole Vault

Product features:

Material: Polyurethane

Length:

Outer diameter:

Product description:

Anti-trauma marker bar for high jump and pole vault stands.

Made with **elastic nylon cord**, and covered in **soft polyurethane**, in alternating **white/black** colours, this crossbar is used in training, instead of the classic fiber or aluminum ones, in order to **prevent any trauma**.

The black/white color makes it extremely **visible in all light conditions**, indoors or outdoors.

The maximum length is approximately 5 meters.

The use of this bar is particularly **recommended in schools** or **sports centers** for athletes who are approaching the discipline of high jump or pole vault.
