

Pair of Supreme high jump stands, IAAF approved

Product features:

Material: Aluminum

Height:

Product description:

Pair of Supreme high jump stands, IAAF approved.

Pair of **Supreme model competition uprights** , made of high-resistance anodized **aluminum profile** , with internal reinforcement inserts.

The particular **double telescopic rod construction** allows **precise height adjustment** , thanks to the metric system stamped on the external side, and easy accessibility to the **positioning of the rod** , using the **"L" shaped brackets** fixed to the telescopic arm.

The double positioning allows you to easily reach **the maximum height of 270 cm.**

The 18-inch **support bases** are made entirely **of steel** and guarantee stability and durability over time.

Moving the structure is also easy, thanks to the **integrated wheels** .
