**Product features:**

Material: Aluminum

Height:

Mepa: Disponibile

**Product description:**

**Pair of Club model high jump stands**

Made of **anodized aluminium** , the pair of Club model **high jump** stands are the ideal choice for small clubs and schools.

Thanks to the practical **adjustable brackets** , it is possible to position **the bar up to a maximum height of 210 cm** . Measurement visible from the **metal metric** positioned inside the upright rod.

Stability is given by the **"T" base in powder-coated steel**, which also guarantees high durability over time.
