

Support platform for mattresses and fall areas in galvanized steel

**Product features:**

Material: Galvanized steel

Finish: Zinc-coating

**Product description:**

**Support platform** for mattresses and jump fall areas, made of **galvanized steel**.

The platform has the function of **raising the mattress** to allow **better management** of the same, **protecting it** from contact with the competition ground.

The **galvanized** version is particularly suitable for **outdoor** use, as galvanizing, compared to painting, offers **greater resistance to rust** .

This support structure is **made to measure** , based on the dimensions indicated by the customer when ordering.

**The price displayed is per square metre.**
