

Pair of regulation football goals in aluminium

**Product features:**

Material: Aluminum

Finish: Powder-coated

Door dimensions: MT 7.32x2.44

**Product description:**

Pair of regulation football goals, in powder-coated aluminium , ovoid section 100x120 mm **complete with sockets to be buried, and spaced rear goal posts.**

This pair of football goals is **UNI-EN 748 certified** and made with specifications that make it installable on **sports fields and stadiums of any category .**

**The measurement is the regulatory one required by FIFA of 7.32x2.44 metres.**

The doors are supplied disassembled, **complete with all the hardware** needed for assembly.

The goals can be equipped with a **series of accessories** to be purchased separately, essential to guarantee the safety of the players on the pitch and necessary for the possible approval of the playing field by the federation:

- Pair of rear steel bed lift flaps **art.GS0996**
- Pair of safety guards for lift flap **art.GS1123**
- Pair of safety guards for net posts **art.GS1089**

Both sets of protections are made of expanded polyurethane foam and covered in white PVC and are made with specifications that make them **compliant with the UNI-EN 913:2009 standards for accidental impacts for sporting use .**
