

Pair of anti-trauma protections for football lift flap

Product features:

Sponge density: 21 kg/m³

Coating: PVC 650gr/m² Fireproof- Class 2 fire rating

Product description:

Pair of anti-trauma protections for lift flaps, for regulation football goals.

Made of **sponge with a density of 21kg/m³**, and covered with **high-resistance PVC** , 650gr/m², **the protectors** must be mounted on the **folding flaps** of the football goals, to protect the players and avoid injuries.

This accessory has become **indispensable** , following the new guidelines provided by **FIFA** , which must be followed to obtain **the approval of the playing field**.

Like all our protections, this model is also made in **compliance with UNI-EN 913:2009 regulations against accidental impacts**, for sporting use.

This set includes protections for the flap of **both football goals**.
