Product description:

Pair of anti-trauma protections for football goal post.

Made of high density **sponge** and **covered in tear-proof PVC** , these protections are mounted on the **goal posts** supplied with **regulation football goals** .

Each set is made up of **two protections** , necessary for a single door (to protect the pair of doors it is necessary to purchase two pairs of protections)

The closure takes place via a practical **Velcro strip**.

This set of protections is also made in **compliance with UNI-EN 913:2009 standards** , against accidental impacts, for sporting use.

The **protection of the goal posts** , in addition to guaranteeing **greater safety for the athletes** , is a fundamental requirement should it be **necessary to approve the playing field**.
