**Product features:**

Sponge density: 21 kg/m<sup>3</sup>  
Coating: PVC Tearing-proof  
Internal diameter:  
Outer diameter:  
Height:  
Mepa: Disponible

**Product description:**

Pair of **anti-accident protections** for **single-pole Volleyball, Beach Volleyball and Beach Tennis facilities**.

Made of **5 cm thick cylinder-shaped sponge** and **covered with tear-resistant PVC fabric** , these protections are an essential accessory to complete **single-pole playground systems** .

The protections go to **cover the pole of the volleyball facility** , up to a **height of 2 meters** , allowing a safe game and **safeguarding the athletes** from possible injuries.

The installation is simple and immediate, thanks to the **velcro strips with tear**, which allow an **easy assembly and disassembly** of the protections.

With an **internal diameter of about 120mm** , they adapt to **all our single-pole volleyball systems** .

With a small surcharge, it is possible **to customize the protectors** with an inscription, or the logo of your sports club, in this case, the color of the protectors will be white.

Once you have placed your order, send us the file to be created in vector format via email.

**Buy a Volleyball, Beach Volleyball or Beach Tennis facility and receive a 30.00 euro discount on the purchase of safety guards - the discount applies directly to the cart**
