Circumference:

Product description:

The **Mikasa V300W** is the second Mikasa match ball approved by the International Volleyball Federation (FIVB) and approved by the Italian Volleyball Federation (FIPAV)

The Volleyball Mikasa **V300W** , as well as the V200W, has an **aerodynamic design** with 18 panels, resulting **perfectly balanced** . This construction **improves ball movement** , giving players **better control**.

The new design makes the ball visible in any game situation.

The Single Dimpled Microfiber surface minimizes air friction and **increases ball control**.

The **Micofiber + PU** materials, developed by Mikasa, guarantee a **soft and pleasant touch** , with **anti-slip functionality**.

The FIPAV counterpart elects it as a match ball for **official matches of the national Serie, regional C and D, provincial first, second and third division championships** , as well as the **Italian Cup matches of Serie B** , Regional Cups and Category championships.
