

Competition Beach Volley Ball FIVB Approved Mikasa VLS300

Product features:

Ball size: 5

Material: Synthetic Leather (PU)

Product weight:

Circumference:

Product description:

The **Mikasa VLS300** ball has been chosen by the **FIVB as the official and exclusive ball for beach volleyball**.

This ball is built with a special technology that makes it unique. The **"Twist Lock" stitching** system designed by Mikasa prevents the **10 panels from opening even after intensive and professional use of the ball**.

These panels are made of a **special synthetic leather called Super Composite**, which make the Mikasa VLS300 **resistant to water, heat and impermeable to sweat**.

The interior is treated with a special **water-repellent finish**, and is completed with an **additional layer of sponge** which avoids the absorption of liquids as much as possible, ensuring that **the official weight is maintained**, even with different climatic conditions or ones rich in humidity.

The grip, already excellent, will be accentuated with use, while the combination of the yellow / white / blue colors, in addition to recalling **the summer colors**, is designed to make the ball **visible to the players and the public** at all times. playing conditions and times.
