

Professional ballast badminton system with wheels

Product features:

Finish: Powder-coated

Height: 155 cm

Product description:

Mobile, ballastable, professional-level Badminton system , entirely made of **powder-coated steel** .

The structure is made up of **two uprights in a single body** , for the maximum possible solidity of the structure.

The main pole is supported in weight by a large base with **ballasted front support and anti-tipping T-shaped rear support**.

the system is then equipped with **two supports, which allow you to add further ballast** , using weight discs (not included)

Ideal for **schools and multipurpose fields** given the easy installation and space-saving storage. Without the risk of losing components.

The structure is **easily removable as it is equipped with comfortable wheels** for transport and a large handle for lifting the system.

On the top of the rods there are **pulleys for tensioning the net**.

the color of the system is according to availability
