

Regulation reclining steel basketball hoop compliant with FIBA standards

Product features:

Material: 2 mm thick steel

Finish: Powder-coated

Product weight:

Internal diameter:

Product description:

Regulation size basketball hoop, in powder coated steel.

An **essential accessory for playing the game** , the basketball basket, or "**ring**" is made of **powder-coated tubular steel Ø 20 mm, orange in color with an internal diameter of 450 mm**, as per **FIBA regulations**

Net attachment using **12 steel hooks** with a diameter of 4 mm equidistant from each other, the hooks have been made in such a way that the space between the hook and the ring is not greater than 8 mm.

The plate on which the ring is welded is made of 4 mm thick box-type steel sheet. **Reinforcement band** welded between plate and ring in 4 mm thick sheet steel. The base in which the release system is contained is made of 4 mm thick box sheet steel, with hole spacing of 115x110 mm for M screws .10.

The **release system** is made up of **2 rotation pins in galvanized steel** diam. 18mm and diam. 12mm, 3 **fixed springs in galvanized steel** , compressed by 3 pins in galvanized steel and self-locking nuts.

The calibration of the release force is set at 65 kg.

The base containing the release system is closed by a 2 mm thick box-type steel sheet, fixed with 4 4.8x16 mm rivets.

The basket is painted with polyester powder, Ral 2004 orange colour, this product is **lead-free and reflects current anti-pollution environmental legislation.**

Supplied with No. 4 galvanized screws M.10x40, No. 4 washers for M.10 screws, No. 1 black rubber plate 5 mm thick with No. 4 holes, No. 1 rope for fixing the net to the hooks

The basket is supplied **excluding the net.**
