

Polyurethane under-basket protections for basketball backboards

Product features:

Material: Polyurethane

Product description:

Under-the-basket accident prevention protection for basketball backboards.

These protections, made of **colored polyurethane**, **prevent the athlete from getting injured** due to the edges of the board during the jumping phase.

Each set of protections is composed of two "L" pieces necessary for covering a scoreboard.

To protect both scoreboards, you need to purchase two sets.

The protection of the basketball backboard is a **fundamental requirement** if approval of the gaming facility is required.
