Product description:

Final covering for the construction of red clay tennis courts, 25 kg bags.

Produced by the **maceration of selected bricks** , coming from the areas richest in iron in the country, which guarantee an **intense red colour**.

The high quality of this covering guarantees a **compact and homogeneous finish**.

Each bag has a weight of 25 kg, and a construction yield of approximately 2.7 kg per m²

the price displayed includes VAT and shipping on national territory. There is a surcharge for remote locations and smaller islands.
