**Product features:**

Sponge density: 21 kg/m<sup>3</sup>

Coating: PVC 650gr/m<sup>2</sup> Fireproof- Class 2 fire rating

Certifications: UNI-EN 913:2009

**Product description:**

**Kit of safety protections for Padel playing field.**

This kit includes a **pair of protections for the playing posts** with velcro closure, and a **set of protections useful for covering the two entrance doors to the playing field** (side uprights + crossbar), equipped with eyelets on the long sides for anchoring by elastic rope.

**All 8 pieces** that comprise this kit are made of high-density **expanded polyurethane (PU) foam** , and **covered in double-layer, tear-proof PVC** , weighing 650gr/m<sup>2</sup>, **self-extinguishing class 2**.

The entire set is made with **technical specifications that make it compliant with UNI-EN 913:2009 standards for sports use against accidental impacts**.

The protections **for playing posts have a height of 105 cm** , and an internal section useful for covering 85x85 mm posts.

**The set of protections for the door jambs** , in compliance with the regulation, can be made with a **height ranging from 200 to 220 cm**, and a **width between 105 and 200 cm** (enter the required dimensions in the order notes).

*Included in the Kit is the silk-screen customization service with your logo printing* (the graphic processing of the image to be created is not included).

Depending on the print to be affixed, the protections can be **yellow or white**.
