Product description:

Pair of accident prevention protections for Padel System Poles

These protections for **playing posts** have a height of **105 cm** , and an internal section useful for covering 85x85 mm posts. **The closure** takes place using **Velcro strips**.

they are made of high-density **expanded polyurethane (PU) foam** , and **covered in double-layer, tear-proof PVC** , weighing 650gr/m², **self-extinguishing class 2**.

The pair of protectors is made with technical specifications that make them compliant with UNI-EN 913:2009 standards for sports use against accidental impacts.

Included in the Kit is the silk-screen customization service with your logo printing (the graphic processing of the image to be created is not included).

Depending on the print to be affixed, the protections can be **yellow or white**.
