##### 50kg professional boxing bag

The **GANA SPORT punching bag** is the summary of the best features that can be requested from a **professional training bag**.

In its standard size, the **bag filled with 50 kg** has a **length of 100 cm** , however it is also possible to choose a **120, 150 and 180 cm version** , to better adapt to your needs, in particular the latter, **perfect for Karate , Taekwondo** and **combat sports** where other parts of the body are used to attack, in addition to fists.

**The lining of the bag** is made of **tear-proof polymer fiber** with a glossy finish, the particular fiber is containment , **ensuring the tightness of the bag** , and at the same time **very resistant**.

**The filling of the bag** is carried out using **microcells of filtered and sanitized silica sand** , the microcells are **sealed and stacked** until the central core of the bag is completely filled and weighed.

Around this core there is a **polyassembled covering of styrene foams** , this **compact and at the same time flexible** material is the key to the **great training comfort** that distinguishes our product.

Thanks to this construction technology , **the possibility of sand loss from the bag is reduced to zero!!**

The dimensions include a **circumference of 110cm** , allowing comfortable training for both the face and the large target.

The **reinforced and heat-sealed seams** have a **double sealing system** which ensures absolutely extraordinary resistance.

Each seam is in fact designed to **support one and a half times the weight of the entire bag** , and to guarantee perfect stability we have created **4 seams with the relative hooks**.

A **chromed steel eyelet and a chain** (in the same material) approximately 30 cm long are firmly fixed to each seam, which converge into a single **carabiner** to be attached to the supporting structure or to one of our shock-absorbing hooks.

In this **50 kg version** it is perfect for **advanced training** and is particularly suitable for use by **adult athletes** accustomed to the world of **boxing and combat sports**.

The bag is produced without prints. Color may vary.
