Product description:

An **essential accessory for using the punching bag** , this **wall support bracket with an entirely steel hook** allows you to easily support **punching bags and Savate bags filled up to a weight of up to 150 kg.**

The bracket is **made of powder-coated steel** , with a thickness of 2mm and **a section of 40x40mm** which makes it solid and durable.

With a **60 cm overhang from the wall** , you will be able to train easily, also taking advantage of **the lateral positions** , and, in the case of use with **longer** bags, such as those from Savate, hitting with the **lower limbs** , without risking injuries.
