Product description:

Infirmary bed for medical examination, with tilting headboard and roll holder.

Made of **tubular steel** , with **powder coating** , the **medical examination table** is an indispensable part of the **furniture inside an infirmary** or a doctor's office.

This sunbed has a **headboard that can be tilted** to multiple positions and a practical **integrated roll holder**.

The backrest and headboard padding has a **height of approximately 9 cm** and is made of high-density flexible **expanded polyurethane (PU) foam** , covered in **soft synthetic leather**.

The synthetic leather covering is very practical, as it **is resistant to wear and dirt** , thus allowing for deep cleaning and **excellent sanitisation**.
