Product description:

Multifunctional Wall Simulator for Volleyball.

The Wall Simulator produced by Gana Sport is an **indispensable accessory for every Volleyball team** that wants to exponentially improve the **performance of its athletes**.

It is a **multifunctional tool** , which allows you to train the **fundamentals of volleyball such as the dunk, lift and reception**.

In its basic version, **the Simulator is equipped with an orientable and height-adjustable panel measuring 80x100 cm** , which simulates the opponent's wall.

However, the structure can be optionally **equipped with the hoop for lifting training, the net for receiving training or both (the wall is always included)**

The Simulator is complete with a **large weighted base** in powder coated steel **equipped with wheels** , which guarantees stability to the tool and at the same time easy mobility.

The upright pole , on which the various accessories are installed, is instead in **galvanized steel** with a diameter of 60mm and has a **length of 275cm**.
