

Indoor accident prevention wall protections on wooden support

Product features:

Material: Wood

Sponge density: 21 kg/m³

Coating: PVC 650gr/m² Fireproof- Class 2 fire rating

Thickness: 40 mm

Product description:

Indoor accident prevention wall protections, made on a wooden base and covered in sponge and PVC.

Indoor wall protections are tailor-made to perfectly adapt to the customer's needs.

Each protection is made **with a 1cm wooden panel**, covered on the front with a 21kg/m³ thick sponge sheet, **4cm thick**, and **covered in 650gr/m² PVC, washable, tear-proof and mould-proof**.

To proceed with **wall installation**, the **protections are equipped with pre-drilled steel plates** (plugs not included).

Perfect for preventing athletes' injuries, the **wall protections produced by Gana Sport** are an indispensable furnishing accessory within every **sports facility**, and wherever **protection against accidental impacts is needed**.

The installation of anti-accident wall protections is **highly recommended within schools and public structures**.

The price indicated is per square meter.
