

Adjustable wall support for ballet barre

Product features:

Material: Galvanized steel

Finish: Powder-coated

Height:

Product description:

Adjustable wall support for ballet barre, made of galvanized steel with powder coating

The support is installed on the wall, in order to **support the ballet barre and allow the exercises to be carried out.**

The support plate, adjustable in height , is made of **galvanized steel** , in order to resist the continuous stresses due to the movement of the adjustable slider, which supports the wooden bar. The latter is made of **powder-coated steel** and has **two pins** which allow you to **fix the height of the bar and stabilize it respectively.**

The great advantage of this support lies in the **possibility of adjusting the height of the ballet barre from the ground** , on two sizes, **90 cm and 110 cm** in order to allow **dancers of different ages to perform the exercises.**
