

Athlete Award Ceremony Podium with three space-saving steps

Product features:

Material: 2 mm thick steel

Finish: Powder-coated

Characteristics:

Dimensions:

Product description:

Three-step athlete award podium with space-saving structure

Designed for **easy transport and storage**, this stackable **three-step podium** is made of **20x20mm powder-coated steel tubing**, and has an 18mm **marine plywood base**.

The steps have a **height of 33, 40 and 47.5 cm respectively** and a wide base in marine plywood with a **non-slip finish**.

The great advantage of this podium for awards is the possibility of **stacking the three steps one inside the other**, occupying a space of only **0.43m²**.
