Dimensions:

Product description:

PVC cone for gymnastics with 12 holes, height 38 cm.

Delimiter cones are used as a **training support in many disciplines** . Their versatility makes them ideal not only for delimiting a space, but also for **creating proprioceptive paths** , with **obstacles of different heights**.

The holes, in fact, allow you to **insert sticks with Ø 28 and 25mm** , while the upper part, in addition to allowing the insertion of a central stick, also allows you to insert **circles with a flat section**.
