Circumference:

**Product description:**

The **Mikasa VT370W** is a ball specially made for training setters in volleyball.

Its design is **inspired by the V200W competition ball**, which also incorporates the aerodynamic 18-panel construction

This construction **improves ball movement** , giving setters **better control over the action**.

Compared to the competition counterpart, the **Mikasa VT370W** is however characterized by the **increased weight of 370gr**, which allows a greater development of the **setter's technical skills**.

Control, also guaranteed by the material with which it is made, a particular Synthetic Leather with a soft finish that guarantees its performance.
