Product description:

The **super soft Trial balls for manball** are made of single-layer blown rubber. They are **super soft** and simulate the classic ball, ideal for **school use and introduction to sport** as the **anti-trauma material** guarantees a game or training in total safety.

They offer an exceptional grip and softness that transmit peace of mind to the boy/girl and **protect him from gaming traumas** . They guarantee **maximum non-toxicity** , **safety** and **ease of use** and are particularly **suitable for learning sports techniques** .

Very suitable for beginners and also ideal for indoor games or individual training at home.

They are silent balls, re-inflatable and also **approved by the IHF - International Handball Federation** . The BA0 model is also approved by the Italian Handball Federation.

The valve, in vulcanized and blown natural rubber to be as light as possible and make the ball perfectly balanced, can be replaced with the special **Trial kit** .

The **BA0 model** , **mini handball** is mainly indicated for **children who are approaching the game of handball** . With a **diameter of 14 cm** and a **weight of 160 g**, they are perfect for **starting the game in total safety** .
