Maximum loadable weight:

Product description:

The Chest Press FWX 5800 is the **Toorx brand machine for professional use.**

The structure is made of **reinforced tubular steel** with a flat oval section 50x110 mm with a thickness of 3 mm. **Movement arms in reinforced steel** with circular section \varnothing 89 mm - thickness 3 mm. The particular double epoxy powder painting gives an anti-scratch treatment.

The backrest of the **Chest press FWX 5800** is made of high-density foam that adapts to the shape of the body ensuring optimal support and comfort.

The peculiarity of this station is the independent movement of the arms and divergent thrust angle for intense and more effective muscular activity.

The **Chest Press FWX 5800** has ergonomic aluminum handles and **POWER GRADE bearing system** .

One Touch seat adjustment system, very practical and fast.

The structure is very robust, weighing 132 kg and can support a user with a maximum weight of 150 kg.

The maximum structure load is 200 kg.
