### Product description:

The **Toorx FWX 5600 Pull Down** station is another of the brand new models in the Toorx professional Free Load line.

The structure is made of **reinforced steel** with a flat oval section 50 x 110 mm - 3 mm thick with double epoxy powder and scratch-resistant painting. **Movement arms in reinforced steel with** circular section diameter 89 mm - thickness 3 mm

The **backrest is made of high-density foam** that adapts to the shape of the body ensuring **optimal support and comfort** .

The **FWX 5600 Pull Down** station has independent movement of the arms and divergent thrust angle for much more intense muscular activity.

Equipped with ergonomic aluminum handles and **POWER GRADE bearing** system to ensure **optimal and precise sliding** .

The **FWX 5600 station** has a **One Touch seat adjustment** system, very practical and fast.

The **structure is very robust** , weighing 119 kg and can support a user with a maximum weight of 150 kg; maximum structure load 200 kg.
