Product description:

The **Shoulder Press FWX 5400 station** is a model of the Toorx professional Free Load line.

It has a **structure with reinforced steel tubing with** a flat oval section 50 x 110 mm - 3 mm thick with double epoxy powder and scratch-resistant painting.

The **Shoulder Press FWX 5400** has independent arm movement and divergent thrust angle for much more intense muscle activity.

Movement arms in reinforced steel with circular section diameter 89 mm - thickness 3 mm

High density foam cushion that adapts to the shape of the body ensuring optimal support and comfort.

The **Shoulder Press** station is equipped with ergonomic aluminum handles and **POWER GRADE bearing** system to ensure optimal and precise sliding.

The structure is very robust , weighing 132 kg and can support a user with a maximum weight of 150 kg; maximum structure load 200 kg.
