Product description:

TOORX PROFESSIONAL LEG EXTENSION FWX-4800 is the **free weight bench** aimed at **training leg muscles** from the new Toorx Professional line.

The **extremely stable and robust structure of TOORX PROFESSIONAL LEG EXTENSION FWX-4800** , made of reinforced steel tubing with a flat oval section of 50x110 mm, is guaranteed for a maximum loadable weight of 150 kg. The particular double epoxy powder painting gives an anti-scratch treatment.

The main features of **TOORX PROFESSIONAL LEG EXTENSION FWX-4800** are the **thrust angle and the ergonomics of the design** which optimize load distribution for intense and effective muscular activity.

The **Power Grade bearing** system ensures precise and progressive movement.

The **backrest and seat cushions** in **high-density foam** adapt to the shape of the user's body ensuring **optimal support and comfort**.

To be loaded with Olympic discs.
