

Vertical back protector support that can be attached to the Swedish backrest

Product features:

Material: MDF (Medium Density Fiberboard)

Finish: Natural transparent colour

Dimensions:

Product description:

The back protector support is an **accessory** for **Swedish wall bars** , very useful for supporting the athlete's back during suspension exercises. This tool allows for optimal execution of the exercise itself, protecting the back during training.

Made of **resistant MDF wood** 1cm thick, equipped with a "c" support structure, **the tool** attaches perfectly to the **Swedish shoulder rest** , providing excellent stability.

The back protector can be easily attached to any height of the backrest to increase training comfort, also in relation to the different exercises to be performed.

Back protector dimensions: 120(h)x 25(l) cm

The item is shipped according to color availability in stock.

Made in Italy product, entirely made in our factories
