

World Athletics approved competition javelin gr. 400

Product features:

Material: Aluminum

Length:

Javelin weight: 400 gr

Product description:

World Athletics approved javelin , made entirely of **400g aluminum alloy**

The tip and tail of this **throwing tool** are made to ensure **excellent performance balance**

The javelin has a weight of gr. 400 , ideal for **competition and training**.

This **throwing tool** was created by focusing attention mainly on the **tip** and **tail** . The structure of the tip and the tapered tail allow an **optimal balance** in the **preparation phase for the launch** and during **the flight phase** , thus guaranteeing **more performing measures**.
