

World Athletics approved competition javelin gr. 500

**Product features:**

Material: Aluminum

Length:

Javelin weight: 500 gr

**Product description:**

**World Athletics approved javelin** , made entirely of **500g aluminum alloy**

**The javelin has a weight of gr. 500** , ideal for **competition and training**.

This **throwing tool** was created by focusing attention mainly on the **tip** and **tail** . The structure of the tip and the tapered tail allow an **optimal balance** in the **preparation phase for the launch** and during **the flight phase** , thus guaranteeing **more performing measures**.
