

Adjustable pull-up bar to attach to the Swedish wall bar

Product features:

Material: 1.5mm thick tubular steel

Finish: Powder-coated

Product description:

Pull-up bar attachable to the Swedish wall bar.

Made entirely of **steel and wood in the grip area**, the **chin-up bar** has a style that perfectly matches the **Swedish shoulder bar** produced by **Gana Sport**. **The adjustment system** is very simple and extremely practical.

Simply by deciding which rungs to attach the tool to, you obtain a different overhang and height that you can refer to to perform the most diverse exercises.

Furthermore, the fixing system makes the bar a single body with the backrest, binding it with maximum holding safety.

The useful grip area is 60 cm. Furthermore, it is made of wood with a diameter of 34 mm,

Made in Italy product, entirely made in our factories
