Product description:

Professional shaped wall punching bag, for hooks and uprights.

This particular punching bag is a tool for **professional training** , intended for the most demanding athletes, in fact it represents not only a valid **alternative to the punching bag** , but a specific tool for the development of the fundamentals of this sport.

The **load-bearing structure** is made of **40x15 mm powder-coated steel** , on which the wooden bag frame is attached and filled with **high-density sponge**.

The covering is made of **650gr/m² PVC** , **tear-proof, mold-proof and class 2 self-extinguishing fireproof**.

The bag is equipped with **electro-welded white PVC focuses** , perfect for indicating to the boxer where to hit with precision.
