Dimensions:

Product description:

Tilting elastic trampoline for artistic gymnastics - 120x120 cm

The trampoline is one of the **fundamental tools in artistic gymnastics**, in fact it allows the athlete to receive the right push to **carry out the vaulting exercises**.

This model, entirely made in our factories, has a **powder-coated tubular steel frame**, the **inclination of which is adjustable** as needed, on which the elastic net is positioned.

In this version, the trampoline has a **total size of 120x120 cm** and is **completed with a high-density sponge accident prevention protection**, covered in **double-layer PVC, tear-proof and mould-proof, self-extinguishing**.
