

Vaulting table for artistic gymnastics

**Product features:**

Material: Powder-Coated

Coating: Sky Suede

Finish: Powder-coated

Height:

Dimensions:

**Product description:**

**Vaulting table for artistic gymnastics in steel, with adjustable height.**

Among the **gymnastic disciplines** , vaulting remains one of the most spectacular and, for some time, the classic "horse" has been joined **by the vaulting table**.

This has the advantage of offering the gymnast a **larger support surface** , thus allowing **more accurate execution of the exercise**.

The vaulting table is made of **powder-coated steel** and has an **adjustable height from 81 to 115 cm**, which can be selected using a practical rotating lever.

The base features **anti-slip pads** to protect the flooring.

The **detachment surface**, measuring approximately **124x93 cm**, is made with a **highly reactive polyurethane foam** , which offers **greater impact absorption and better thrust** , this is then covered with a **non-slip, abrasion-resistant fabric**.
