

Replacement plastic-coated steel cable for isotonic tools

Product features:

Material: Powder-Coated

Coating: PVC

Characteristics:

Diameter: 54 mm

Product description:

Nylon coated steel cable for professional isotonic tools.

Made of **plasticized steel** , it has a total diameter of 5.4 mm, and a **guaranteed minimum breaking load of 1200 kg**.

The cable is the perfect **replacement** for all **professional isotonic machinery**, where there is a need to replace a worn cable, which could break with consequent risk for the user.

The price is per linear metre.
