

Pair of nylon wheels for transportable football and five-a-side football goals

**Product features:**

Material: Nylon

Finish: Powder-coated

Outer diameter:

**Product description:**

**Pair of nylon wheels for transportable football and five-a-side football goals**

Made of **nylon** , with a **diameter of 8 cm and a thickness of 3 cm** , this pair of wheels is **perfect for allowing easy movement of 3x2 meter soccer goals** and 4x2, 5x2 and 6x2 meter reduced football goals.

Nylon is an **extremely resistant material** , and is therefore **suitable for all surfaces** , both synthetic and natural grass fields, or even clay and concrete football fields.

The attachment is carried out **at the rear of the doors** , using a vice to be tightened with bolts.

Once mounted, simply **tilt the goal to be able to move it within the playing field.**

**Each set relates to a pair of wheels** , therefore useful for moving a single door. To equip both play goals with wheels, you need to purchase two pairs.
