Product description:

The two-seater "Venere" swing with flat rectangular seat and cage seat is made on a load-bearing structure entirely in aluminum with extruded profiles with a round section without edges with a diameter of mm. 80, with internal tubular steel reinforcement core Ø 76 mm, which guarantees greater structural stability.

The upper beam is made of galvanized and painted tubular steel with a section of mm. 150x50x3 thick.

Equipped with rubber seats with pre-pressed steel core, on close-knit galvanized chains. The movement takes place on self-lubricating Teflon bushings.

The structure is designed for fixing to the ground using metal brackets to be cemented into the foundation.

Characteristics:

Drop height (HIC): cm. 140

TUV approved for " public use" according to EN 1176:2017 standards
