Product description:

The three-seater "Giocari" swing is made on a load-bearing **structure** entirely **in painted aluminum** with extruded profiles with a round section without edges with a diameter of mm. 80, with **internal tubular steel reinforcement core** Ø 76 mm, which guarantees **greater structural stability**. **This carousel is also approved for PUBLIC USE!**

The upper beam is made of galvanized and painted tubular steel with a section of mm. 150x50x3 thick.

Equipped with three **seats with pre-pressed steel core**, on close-knit galvanized chains. The movement takes place on self-lubricating Teflon bushings. Also available in the 2-seater version (mother-child)

The structure is designed for **fixing to the ground using metal brackets** to be cemented into the foundation.

Characteristics:

Drop height (HIC): cm. 140

TUV approved for " public use" according to EN 1176:2017 standards
