

Professional dumbbell with selectable load from 3 to 32 kg Diamond

Product features:

Material: Steel and Aluminium

Characteristics:

Product description:

Professional dumbbell with selectable load from 3 to 32 kg Diamond

The **Diamond selectable handlebar** is an ideal solution for those looking for a **professional product that takes up as little space as possible**.

Each handlebar is **made of steel and aluminum** , and has a handle covered in **high density foam**, which improves the grip.

The load is freely selectable, by means of a rotary snap mechanism, **from 3 to 32 kg**, with increments of 1 kg and 0.5 kg.

The handlebar boasts a stainless steel electroplating and anti-rust, which gives it solidity and durability.

The base is included in the standard equipment
