

Multipurpose sports facility in galvanized steel with a diameter of 50 mm

#### Product features:

Material: Galvanized steel

Finish: Zinc-coating

Pole section: 50 mm

Mepa: Disponibile

#### Product description:

The **Gana Sport single-pole sports facility** is entirely made in our factories. It can be used for sporting activities such as **volleyball, beach volleyball and beach tennis** (with a special 4.5 cm mesh net)

**The pole** is made of **galvanized steel** with a diameter of 50 mm and a height of 280 cm. **The height of the net** can be adjusted with a **painted steel slider**, with a **sliding system** along the entire length of the pole. The height of the net can be positioned up to the regulation size of 243 cm.

The system is completed by a **net tensioning winch** with **anti-snap system**.

The ease of assembly and disassembly allows the system to be used in **multifunctional fields** used for different sports.

The pole must be housed in the appropriate **sockets supplied**. The sockets must be buried 40 cm in the case of installation on the floor and 60 cm for installations on sand.

**Purchase a Volleyball, Beach Volley or Beach Tennis facility and receive a discount of €30.00 on the purchase of accident prevention protections - the discount is applied directly to the cart**
