

Vinex Aero 300g aluminum javelin

Product features:

Material: Aluminum

Length:

Javelin weight: 300 gr

Product description:

300 gram Vinex Aero aluminum training javelin

Throwing javelin, **made of powder-coated aluminium** , with **steel tip** and natural **rope** handle.

Characterized by **excellent balance** , this javelin **weighing 300 grams** is perfect for training and **approaching the discipline**.

The aluminum with which it is made maintains solidity and elasticity allowing the tool to **maintain its trajectory during flight** , the natural rope handle **then improves the grip** , aiding measurement.
