

Product features:

Material: Aluminum

Length:

Javelin weight: 400 gr

Product description:

Vinex Aero aluminum training javelin weighing 400 grams

Throwing javelin, made of powder-coated aluminium, with steel tip and natural rope handle.

Characterized by **excellent balance**, this javelin **weighing 400 grams** is perfect for training and **approaching the discipline.**

The aluminum with which it is made maintains solidity and elasticity allowing the tool to **maintain its trajectory during flight**, the natural rope handle **then improves the grip**, aiding measurement.
